

SRI Publications 2019 Catalogue

You can preview our books at www.simplicitysg.net/books and purchase them from our online store www.store.simplicitysg.net or Amazon.com.

The E-books are available from Google Books.

Cover images are on the next page

- 1. Little Butterfly: Coloring and Story Book**
is about a butterfly on a journey of self-discovery. Color the rich illustrations as the story unfolds, and let your imagination soar! Whether you are into art therapy, looking to enjoy an intriguing story, or just need something fun to do, you will find ample opportunities within this one book.
- 2. Sri Anthology: Real-Life Travelers Tales**
In this collection of nonfiction, nine authors share their separate experiences from exploring different corners of the globe. In these stories you will find adventure, fear, amusement, heartbreak, mystery, amazement, and hope....
- 3. Erebus: Ten Stories**
Life is a journey with choices. We can feed our ego, anger, fear and self-pity; Or we can choose an alternative path. Two authors explore the possibilities in this collection of short stories.
- 4. Viral Shapeshifters: Strange Behaviors of HIV and Other Viruses**
This book explains the story of each virus in terms of evolution and its interactions with humans. It argues that early vaccine successes with the smallpox and polio viruses were due to the hard shells of those viruses, and proposes an explanation of why it has not been possible to replicate that success with HIV and some other viruses.
- 5. Simplicity in Complexity: An Introduction to Complex Systems**
How do scientists model crowd behaviour, epidemics, or earthquakes? What can we learn from the collective intelligence and adaptability of an ant colony? This book answers such questions by highlighting common themes such as self-organisation and emergence in the study of complex systems.
- 6. Physics: Volume One, Classical Foundations**
A concise survey of the foundations of classical physics, focussing on conceptual issues and their limitations. The presentation is aimed at enthusiasts in schools and beyond.

- 7. Integrated Mathematics for Explorers**
Structured to make learning interesting for students with different interests in high-schools and liberal arts colleges. In addition to worked examples, practice questions and challenges, there are suggestions for self-study, puzzles, and a list of unsolved mathematical problems.
- 8. Solutions Manual: Integrated Mathematics for Explorers**
Accompaniment to Integrated Mathematics for Explorers.
- 9. Real World Mathematics**
Intended as a resource for those who wish to teach and learn mathematics through real world applications. Suitable for high-schools and liberal arts colleges.
- 10. Solutions Manual: Real World Mathematics**
Accompaniment to Real World Mathematics.
- 11. Handbook of Mathematics**
In addition to providing reference for the usual topics covered in high-schools and colleges, this book includes eclectic tidbits to stimulate enquiry and investigation.
- 12. School Mathematics Series**
The six volumes in the series contain brief review notes, worked examples, and test questions with answers. Suitable for high-schools and liberal arts colleges. Topics covered include exponents, logarithms, polynomial equations, rational functions, simultaneous equations, matrices, coordinate geometry, plane geometry, trigonometry, differential and integral calculus.
- 13. Mathematical Escapades**
A collection of challenges, with solutions. For high-school students.
- 14. Free E-books**
Download our free E-books from www.simplicitysg.net/books/free-ebooks
